(Approved) Global Navigation

General Description

User interface and behavior of top and left navigation panels and footer.

Pre-Condition	Successful login or any page with global navigation
Trigger	Successful login or global navigation links clicked
Process	n/a
Post-Condition	Any page linked from global navigation

Business Rules

User types that have access	All user types.

| Assumptions	User is logged in
Business Rules	- Left navigation options are permission based. We may suppress some parts of the left navigation based on the user. - Accessibility to multiple companies and/or multi brands is permission based.
Typical Behavior	Scenario 1: A merchandiser user has access to one brand. Scenario 2: An internal OceanX user will have access to multiple brands.
Alternate Behavior	User has access to more than one company and/or more than one brand
Determination of successful result	User is successfully transferred to a page linked from the navigation.

Typical Behavior
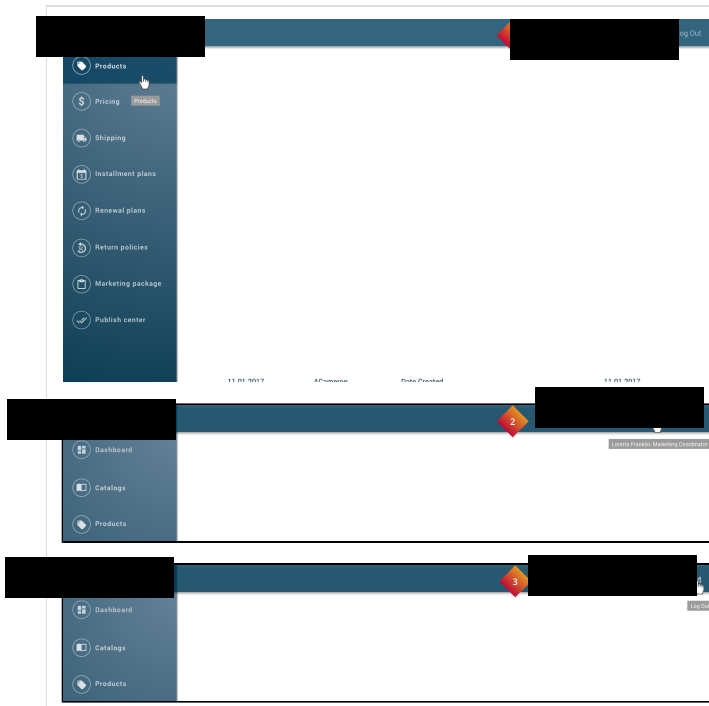

1. Top Navigation displays Brand name, Username, Log Out link. Log Out action is available only from the top navigation.
2. User role is displayed in the tooltip along with the username
3. Logout leads back to the login page.
4. Left nav contains menu items that are based on the user role.x

Alternate Behavior - Brand Switch

1. If user has access to more than one brand, they may select to switch to another brand
2. By clicking on the currently displayed brand name, user triggers a drop-down menu with all available brands (per user role)
3. By clicking on the desired option in an expanded dropdown list, user is sent to a default "landing" page for the selected brand
